Geopolitics of Oil and Gaz

Fueling Geopolitical Influence

OVERVIEW

This workshop examines how oil and gas shape global power, influence foreign policy, and drive regional conflicts. It provides professionals with the tools to analyze energy-related geopolitical dynamics and anticipate strategic developments in a rapidly evolving energy landscape.

Audience

This workshop is intended for professionals specializing in geopolitics, energy policy, international relations, and security strategy. It is particularly suited for diplomats, policy advisors, analysts, and executives in the energy sector who seek to understand how oil and gas influence global power structures and regional dynamics.

Instructors

The workshop will be led by experienced experts in energy geopolitics, combining academic, diplomatic, and industry backgrounds to provide a comprehensive and practical understanding of oil and gas in global power dynamics.
