Introduction to Geopolitics

Understanding The World

OVERVIEW

This workshop provides a foundational understanding of geopolitics, exploring how geography, power, and strategy influence global affairs. Participants will learn key geopolitical theories, analyze current international tensions, and examine the role of state and non-state actors. Through case studies and discussions, the session aims to build strategic thinking and equip attendees with tools to interpret global dynamics.

Audience

This workshop is tailored for professionals, diplomats, politicians, and decision-makers, offering them essential tools to understand and analyze global geopolitical dynamics. It supports strategic decision-making by enhancing their ability to interpret international developments and anticipate risks in a complex and shifting world order.

Instructors

The workshop will be conducted by seasoned experts in geopolitics and international affairs, including consultants, diplomats, professors, and security specialists, combining academic knowledge with practical experience to deliver an engaging and insightful learning experience.
