Legal Aspects of Oil & Gas Contracts

"Clarity in law secures value."

OVERVIEW

This workshop offers in-depth legal insight into the structure, interpretation, and risk management of oil and gas contracts. Participants will gain practical understanding of various contract types, key legal clauses, and jurisdictional considerations that define rights, responsibilities, and liabilities across the energy value chain. Designed to strengthen both legal precision and strategic awareness, the workshop enables participants to navigate complex legal environments, negotiate effectively, and safeguard operational and financial interests in the global oil and gas sector.

Audience

Tailored for legal advisors, contract managers, in-house counsel, energy sector executives, regulatory officials, and policymakers involved in drafting, negotiating, or enforcing oil and gas contracts. It is particularly valuable for professionals working in multinational energy projects or in jurisdictions with evolving legal and regulatory frameworks.

Instructors

Led by seasoned energy lawyers, legal scholars, and international arbitration experts with deep experience in drafting, negotiating, and litigating oil and gas contracts. Instructors have advised governments, IOCs, and NOCs, and bring both legal clarity and strategic depth to contractual risk and compliance.
