

STRATEGIC WATERS

FREEDOM OF NAVIGATION

MARITIME SECURITY

CRISIS RESPONSE

Case Study: Strait of Hormuz

- 
- Analyse
 - Assess
 - Advise

OVERVIEW

Strategic straits are among the world's most sensitive maritime pressure points, where freedom of navigation, security concerns, trade routes, energy flows, and state sovereignty meet. This course offers a practical and legally grounded understanding of **maritime law**, **international straits**, **navigation rights**, and **crisis-response tools** in times of regional tension. Through real and contemporary scenarios, including the **Strait of Hormuz** as a case study, participants will learn how international law applies when sea lanes are threatened, vessels are intercepted, or maritime routes become part of a wider security crisis.

AUDIENCE

This course is designed for professionals and advanced learners working at the intersection of law, security, maritime affairs, trade, and policy. It is ideal for **law students**, **lawyers**, **legal consultants**, **military legal officers**, **naval and security professionals**, **port authorities**, **shipping and logistics professionals**, **policy analysts**, **researchers**, and **public-sector officials**.

It is also suitable for non-specialists who want to understand the legal and strategic importance of international straits, maritime security, and freedom of navigation in today's global environment.

INSTRUCTORS

The course is led by **maritime law specialists**, **legal practitioners**, and **security professionals** with relevant experience in international law, the law of the sea, maritime security, and crisis response. With academic expertise and operational/advisory insight, the instructors will guide participants through practical legal scenarios.
